1 Company Profile

1.1 ABOUT US

Founded during the energy crisis of 1978 in India, ENCON Thermal Engineers Pvt Ltd is a pioneer in industrial heating and energy conservation solutions. The name “ENCON” stands for Energy Conservation & Conversion, reflecting the company’s commitment to sustainable energy practices. With over four decades of industry experience, ENCON specializes in providing innovative, reliable, and cost-effective thermal systems and equipment for various industries, including iron and steel, automotive, foundries, aluminum, glass, cement, pharmaceutical, and more.

We are well known for Designing, Manufacturing, Supplying and Commissioning of -FUEL EFFICIENT HEATING SYSTEMS on Turnkey basis

1.2 INDUSTRIES WE SERVE

Ayurvedic & Herbal Industries

Energy Conservation & Energy Conversion

Combustion System, kiln, furnaces

Pharmaceutical Industries

Steel Plant

Transformers Industry

Automotive Industries

Cement Industries

1.3 SOME OF OUR ESTEEMED CLIENTS

1.4 RESEARCH & DEVELOPMENT

At ENCON, our dedicated R&D division plays a crucial role in driving innovation and new developments. Our team of experts is continuously engaged in research to improve existing products and develop new technologies that enhance energy efficiency and performance. This commitment to R&D allows us to offer cutting-edge solutions that meet the evolving needs of our clients.

Recent developments from our R&D team include advancements in SELF Recuperative Burner and Regenerative Burners, which significantly improve thermal efficiency and reduce energy consumption in high temperature application. We are also exploring new materials and designs to further enhance the durability and effectiveness of our products.

1.5 OUR COMMITMENT

We are committed to building long-term partnerships with our clients for the last 46 years and providing tailored solutions that meet specific needs, and contributing to a sustainable future through energy conservation and innovation. ENCON's dedication to excellence is reflected in our core values: integrity, quality, customer focus, and continuous improvement.

As a trusted name in the industry, ENCON has successfully executed numerous projects worldwide, earning a reputation for reliability and technical expertise. Our customer-centric approach ensures that we not only meet but exceed client expectations, offering support and guidance throughout the project lifecycle.

ANNEXURE –I
SCOPE OF SUPPLY

Data provided by Viraj.:

Recuperator Will be manufactured as per the drawing No. VPL-RMD-1011-0001.

Our scope of supply will cover design, engineering, manufacture, and supply, of the following: -

GENERAL DESCRIPTION:

Recuperator will be of Convective type having two passes for air and single passes for flue gas. The flue gas will pass over the bank of the tubes while air will pass through the tubes. The recuperator shall be manufactured from Stainless Steel grade SS-316 for hot and grade CS for cold bank and the same will be bended to take care of elongation during heating of the recuperator.

Material of construction of Recuperator

COLD BANK

Tube Plate	: CS
Tube	: CS, ERW Straight pipes, OD: 48.3Schedule- 40
Duct Inlet	: Mild Steel
Inlet Collar	: Mild Steel

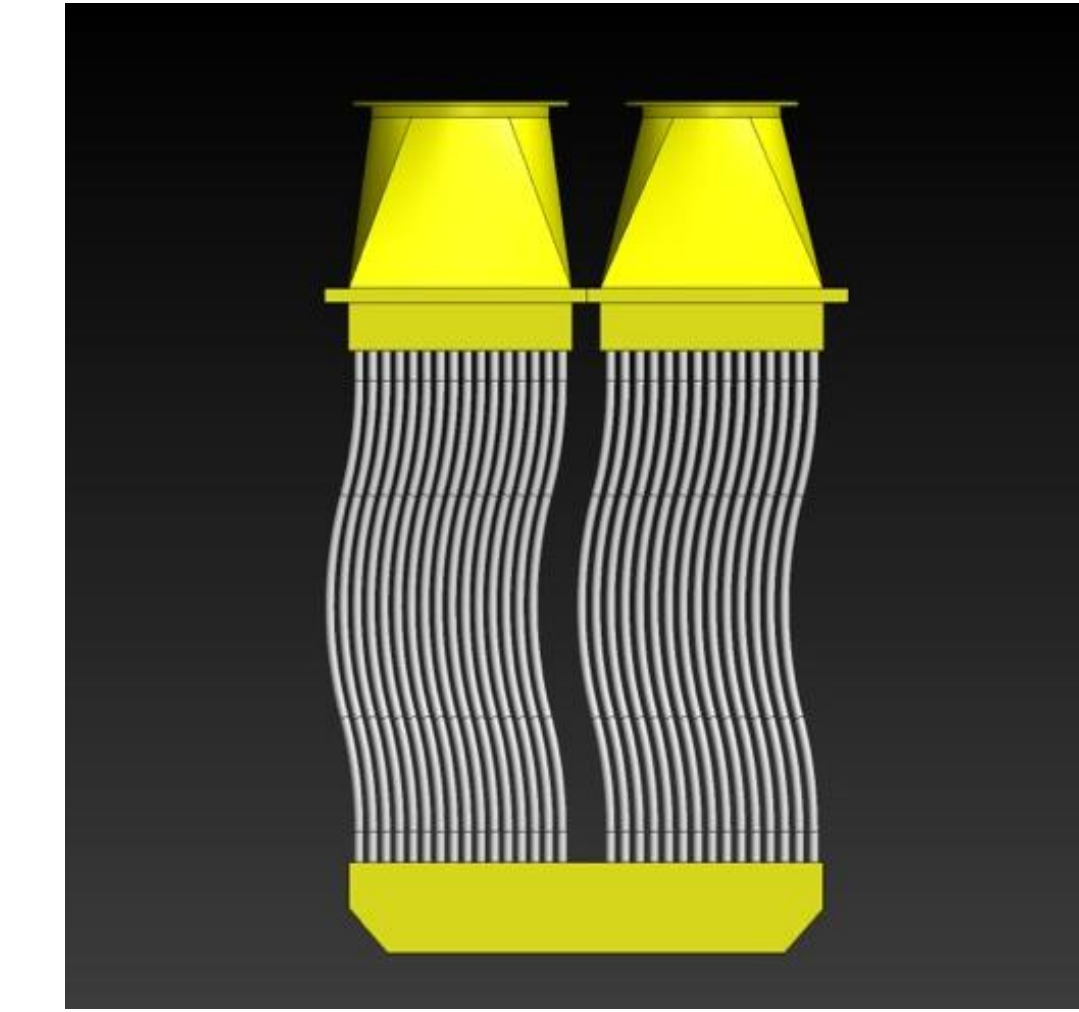

HOT BANK

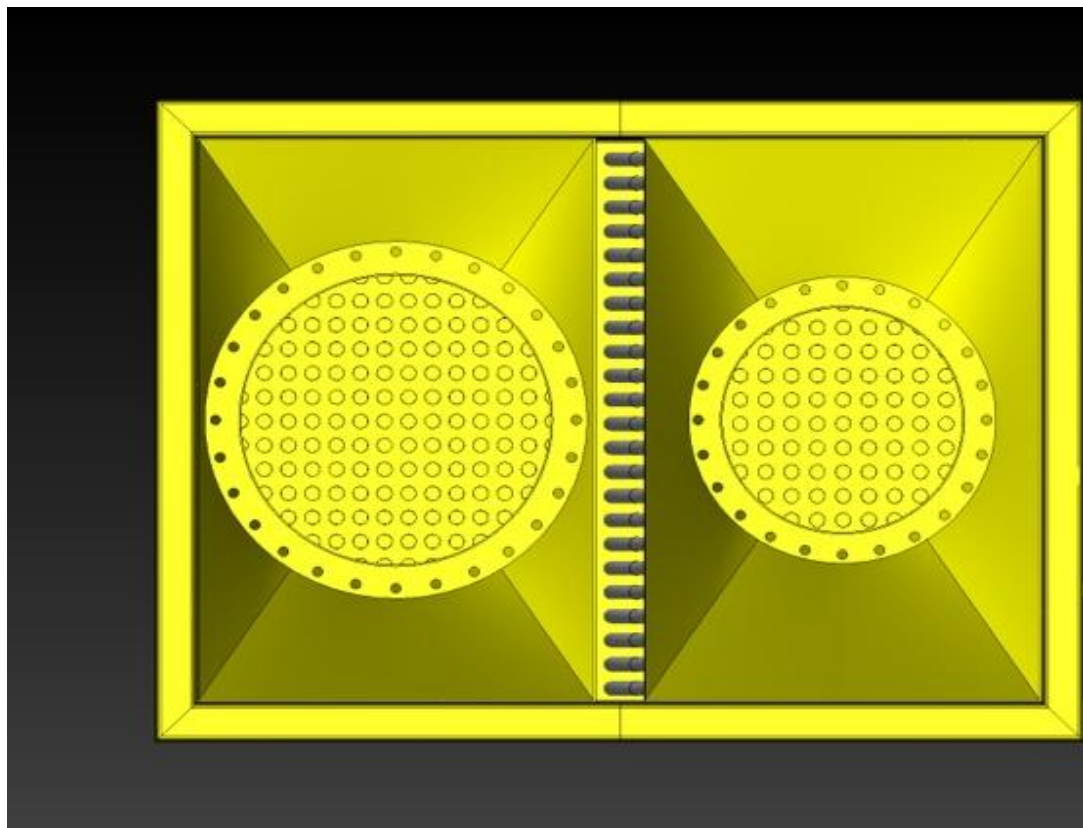

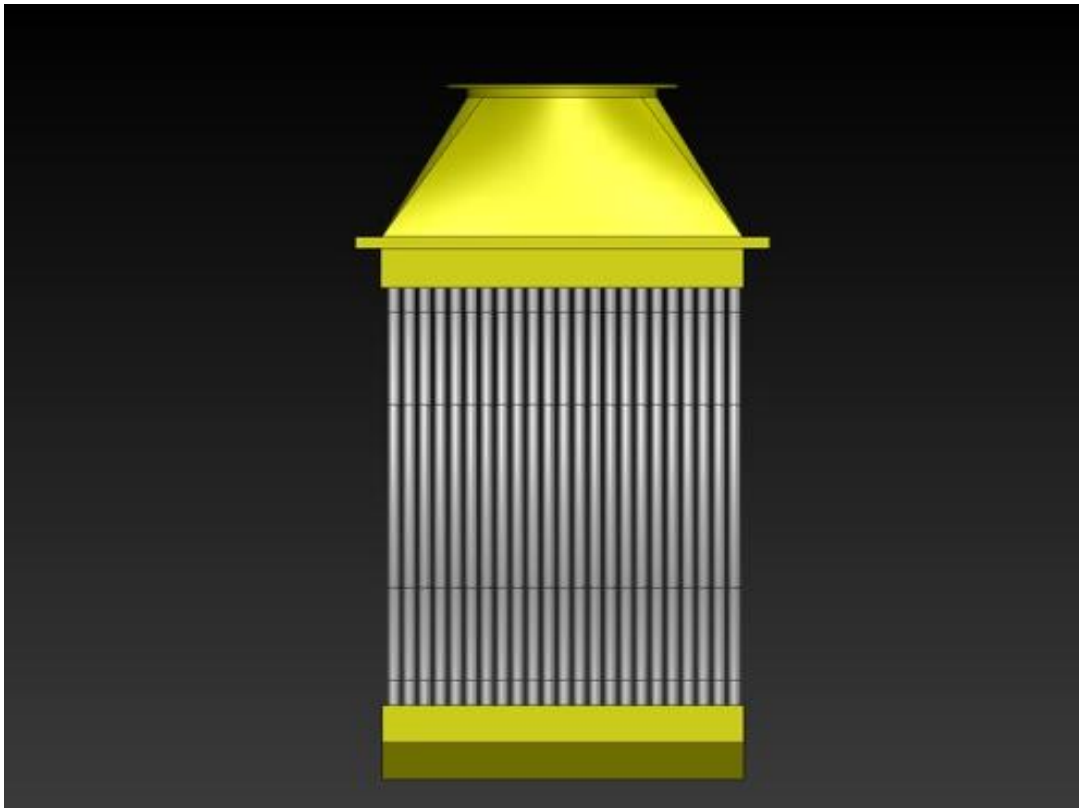

Tube Plate	: SS-316
Tube	: SS- 316 Bended, ERW pipes, OD-48.3
Schedule- 40	
Duct Outlet	: Mild Steel
Outlet collar	: Mild Steel
Supporting Frame	: Mild Steel
Bottom Duct	: Mild Steel
Flange	: Mild Steel

OTHERS

Flanges	: Mild Steel
Air inlet duct	: Mild Steel
Air Outlet duct	: Mild Steel
Bottom air receiving box	: Mild Steel
Matching flange	: Mild Steel
Nut, bolt & washer	: Mild Steel
Gasket	: Heat resistant
Supporting structure	: Mild Steel
